ABOUT ME

Bilingual Web Designer with over 8 years of experience crafting high-converting, visually compelling digital experiences. I specialize in building scalable design systems in Figma and translating them into pixel-perfect, responsive Webflow builds. Going beyond traditional design, my deep foundation in front-end architecture and CRO ensures that every interface is not only aesthetically striking but also optimized for performance and user engagement.

WORK EXPERIENCE

Web Designer & Digital Creator | Grupo Don Julio

Oct 2025 - Present

- Design high-performing digital marketing assets across multiple formats, maintaining strict brand consistency and strong visual fundamentals (color theory, typography).
- Develop user-centric landing pages and visual systems, collaborating closely with internal teams to drive marketing goals.

Web Design Lead & Technical QA | PartnerHero

Feb 2021 - May 2025

- Led a team of 12 web professionals in a high-volume, fast-paced environment, bridging the gap between design and technical implementation.
- Developed and maintained scalable UX design systems, component libraries, and style guides.
- Conducted rigorous UX/UI audits and design QA, optimizing operational workflows to meet both aesthetic standards and technical scope.

Webflow Designer & Developer (Freelance)

Jun 2020 - Present

- Designed and built responsive websites from scratch, creating wireframes and high-fidelity prototypes in Figma before developing pixel-perfect Webflow and Shopify implementations.
- Applied structured naming conventions and CMS best practices to deliver performance-driven sites optimized for conversions
